

TOP SECRET//~~REF ID: A4~~

For Mr. Humsaine's eyes only

27 September 1947

My Dear Carl r. Colonel Clarke my messenger to you of yesterday September 26th has reported the result of his delivery of my memo dated 25th. As I understand him you were unwilling to commit yourself to any agreement regarding what communicating its contents to any other person in view of the fact that you felt you already knew certain of the things probably referred to in the memo, he suggested to you by seeing the security clearance of MAJIC, and that you could not feel that such a letter as this could have been addressed to you without the knowledge of the President.

As to (a) above I am quite willing to have you read what comes hereafter with the understanding that you are bound not to communicate to any other person any portions on which you do not have or later receive factual knowledge from some other source than myself. As to (b) above you have my word that neither the Secretary of Defense nor the President has any intimation whatsoever that such a letter has been addressed to you or that the preparation or sending of such was being considered. Assure you that the only persons who now or know of the existence of either this letter or my memo of you dated September 25th are General Eisenhower, seven key officials responsible for security of MAJIC military communications, and my Secretary who typed these letters.

I am trying my best to make up my mind what to do about this letter addressed to you. In my interview with General Eisenhower I have not consulted any one else. I have not even shown the letter because the only persons who now or know of it are those mentioned above. I am inclined to do nothing at present but to take some action if necessary to protect the letter in our armed forces.

You should have much greater interest in this letter than I do. I do not advise a method that would not be safe. I do not advise reactions of any kind by the Secretary of Defense or any member of the military establishment. I do not advise any disclosure of the letter to the press or to the public. I do not advise any disclosure of the letter to the State Department. I do not advise any disclosure of the letter to Congress. I do not advise any disclosure of the letter to any other government official. I do not advise any disclosure of the letter to any other person.

You must understand from the foregoing the gravity of this letter. If the present rumors regarding New Mexico are disclosed to the public government or congressional committees or any other organization we possess.

Please keep this letter in your safe. Do not let anyone see it except your secretaries and those persons having clearance including the President.

Very truly yours,
